LEGAL ENTITY IDENTIFIER

RapidLEI®

PILOT PROGRAM

Legal Entity Identifier (LEI) Services for Banks

**Using LEIs to streamline and reduce costs of
KYC & Onboarding**

Introduction

The banking sector relies on counterparty identification and verification for client lifecycle management in many use cases. The subscription fees for the KYC data and the connection and management of various data points lead to high costs, with the global banking sector spending around \$40 billion on client onboarding annually.

Use of Legal Entity Identifiers in KYC and onboarding has the potential to be a significant cost saving tool, with measurable impact to people/staff productivity, the streamlining of processes, and improved transparency into available entity data.

LEI pilot for banking

Ubisecure is a GLEIF accredited LEI issuer and offers a pilot program for banking institutions to use LEIs in their KYC and onboarding scenarios. The service includes live lookups to the global LEI database with on-demand LEI issuance and SaaS-based lifecycle management of issued LEIs, to scale to banking customer quantities. The pilot is a tri-party engagement with Ubisecure, the Global LEI Foundation (GLEIF) as an independent and agnostic party, and the bank itself equally invested in realising the benefits of LEI usage.

RESEARCH CONDUCTED BY MCKINSEY ON BEHALF OF THE GLOBAL LEGAL ENTITY IDENTIFIER FOUNDATION (GLEIF) HAS CONCLUDED THAT BROADER USE OF LEGAL ENTITY IDENTIFIERS (LEIS) ACROSS THE GLOBAL BANKING SECTOR COULD SAVE THE INDUSTRY U.S.\$2-4 BILLION ANNUALLY IN CLIENT ONBOARDING COSTS ALONE. THE WIDESPREAD USAGE OF THE LEI CAN GENERATE TOPLINE BENEFITS ACROSS ALL STAGES OF THE CLIENT LIFECYCLE MANAGEMENT PROCESS FOR BANKS, INCLUDING KNOW-YOUR-CUSTOMER REQUIREMENTS. WE ARE EXCITED THAT WIDER USE OF THE LEI BRINGS SUCH SIGNIFICANT POTENTIAL BENEFITS TO THE BANKING SECTOR, AND OUR PRIORITY AT THIS STAGE IS TO SUPPORT VOLUNTARY ADOPTION OF THE LEI IN BANKING USE CASES BEYOND REGULATORY REPORTING SO THAT THESE BENEFITS CAN BE FULLY REALIZED."

Global LEI Foundation

This pilot outline provides a brief background on the potential benefits of LEIs to banks, highlights the datapoints from the McKinsey survey, and details how a bank may engage in the LEI pilot programme.

About LEIs

A Legal Entity Identifier is a 20-character identifier that identifies a distinct legal entity. It is defined by the ISO 17442 standard, endorsed by the G20, and acts as “the one identity behind every business”. As of September 2019, over 1.5 million legal entities worldwide have registered LEIs.

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20
LOU IDENTIFIER Prefix used to ensure uniqueness among codes from LOUs				ENTITY IDENTIFIER Entity-specific part of the code generated and assigned by the LOUs according to transparent, sound and robust allocation policies														VERIFICATION ID Two check digits as described in the ISO 17442 standard	
5	2	9	9	0	0	T	8	B	M	4	9	A	U	R	S	D	O	5	5

LEIs provide a publicly-available verifiable source of ‘who is who’ (organisation identity) and ‘who owns whom’ (organisation group structures). The system is operated by the GLEIF and the ability to issue LEIs is awarded to a limited number of organisations (like Ubisecure through its RapidLEI service) - passing a stringent accreditation process to become LEI issuers.

Role and impact of LEIs in KYC and onboarding

If banks extend the utilisation of LEIs beyond regulatory reporting in capital markets to other banking business lines, such as trade financing, corporate banking and payments, the resulting efficiencies in improvements in customer lifecycle management would generate significant cost and time savings.

Figure from: GLEIF eBook “The power of LEIs to transform client lifecycle management in banking: A U.S.\$4 billion beginning”.

Sector	Use case	Business activity sub-use cases	Counterparty action
Banking	Client lifecycle management	Client onboarding	Bank verifies legitimacy of client prior to onboarding
		KYC refresh	Bank re-verifies legitimacy of client on an ongoing basis
		Transaction verification/AML compliance	Bank verifies legitimacy of an entity and its trading partner
			Bank verifies legal entity included in payment instructions is legitimate
			Bank filters entities for further AML review and performs enhanced due diligence process on flagged entities
			Bank verifies legitimacy of both a buyer and leaser prior to issuing financing as part of a lease agreement
			Lessor (bank) verifies legitimacy of a leaser prior to good shipment
			Factor (bank) verifies legitimacy of the buying and selling entities prior to accepting a pledged A/R
			Seller gives buyer and factor each other's LEI
			Bank checks invoices against pledged A/R
			Bank verifies the legitimacy of an entity prior to loan origination
	Risk management reporting and analytics	Compiling client static reference data	Bank reviews relevant business data such as account structure, address, key people etc
		Monitoring client activity for compliance or risk management purposes (e.g., client credit worthiness monitoring)	Bank monitors entity and parent entity activity

Figure 1: Client lifecycle management use cases that could benefit from early stage LEI deployment. Source: McKinsey, 2019

From the interviews completed by McKinsey with banks (of various sizes and geographic reach), banking regulators, and other sector participants and experts, four major pain points in client identification and verification came to light. These pain points are addressable by LEI utilisation:

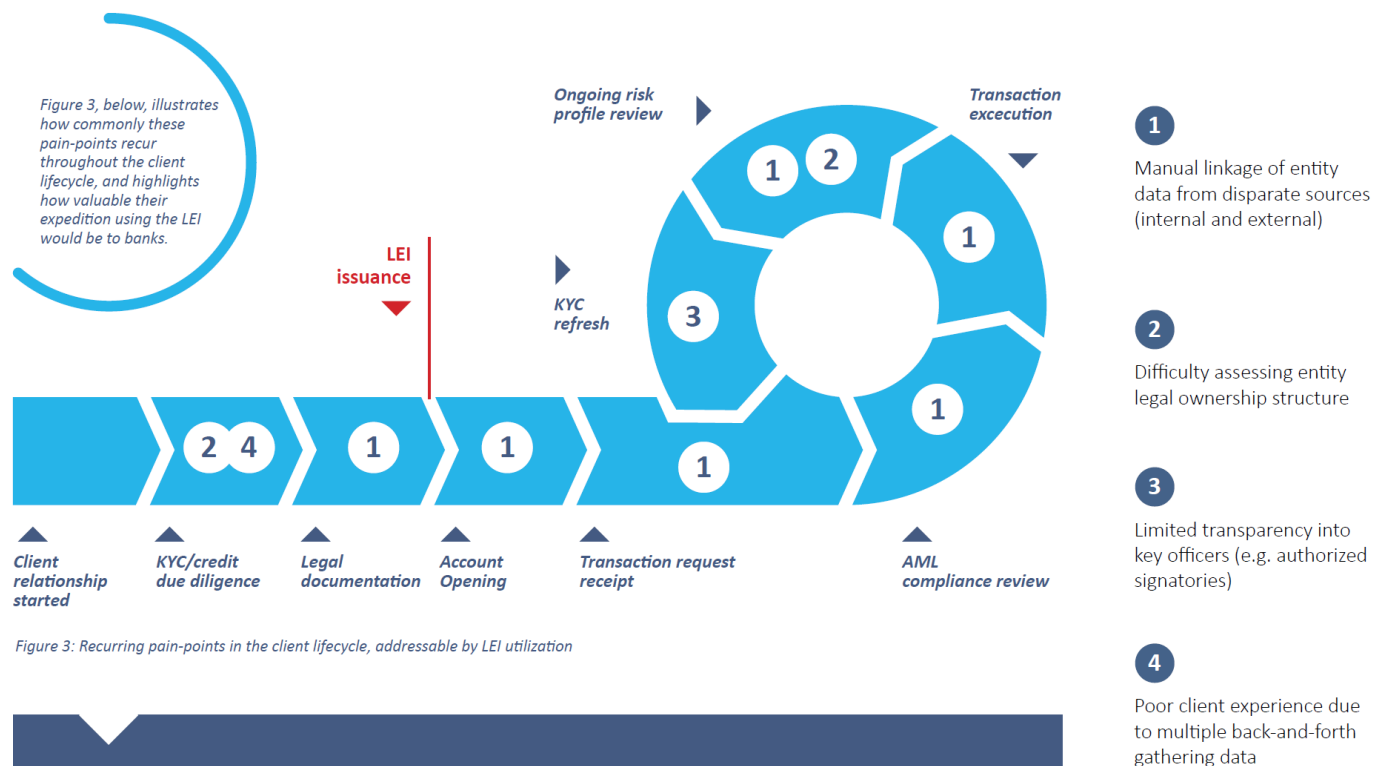

Figure 3: Recurring pain-points in the client lifecycle, addressable by LEI utilization

The study found that many banks try to resolve these problems by implementing various technical solutions, increasing headcount, or just accepting longer cycle times. Since none of these methods fully resolves any of these pain points, many banking interviewees responded enthusiastically to the idea of using LEIs to identify and verify counterparties.

Figure from: GLEIF eBook "The power of LEIs to transform client lifecycle management in banking: A U.S.\$4 billion beginning".

USING LEIS TO REDUCE PEOPLE COSTS

Today, the global banking sector spends around \$40 billion on client onboarding annually. That's an estimated \$54 million per bank, of which approximately \$31 million is 'people' cost.

Such costs include increase in human resources to: link identity data points; assess ownership structure detail; identify officers; and communicate back-and-forth with customers. Productivity improvements for these activities gained through LEI usage could generate cross-sector cost reductions of between 5-10% annually.

USING LEIS TO REDUCE TIME TO REVENUE

By using LEIs to streamline processes for connecting with internal and external data sources, banks could realise an estimated 14% reduction in client onboarding time.

- Gains from reducing duplicative data entries and improving data access across internal systems.
- Gains from reducing manual data lookups and enabling straight-through processing across external data sources.

Managing LEIs at scale – automation is key

To realise the positive impact of the LEI, banks must be able to easily manage the lifecycle and be assured of optimum quality of the identity data encapsulated within the LEI. To achieve this at scale with tens to hundreds of thousands of customers, automation is key. The bank must use a solution that connects directly to the various business registries, offers same-session issuance, and offers robust management tools and reporting that can be directly integrated into existing KYC services.

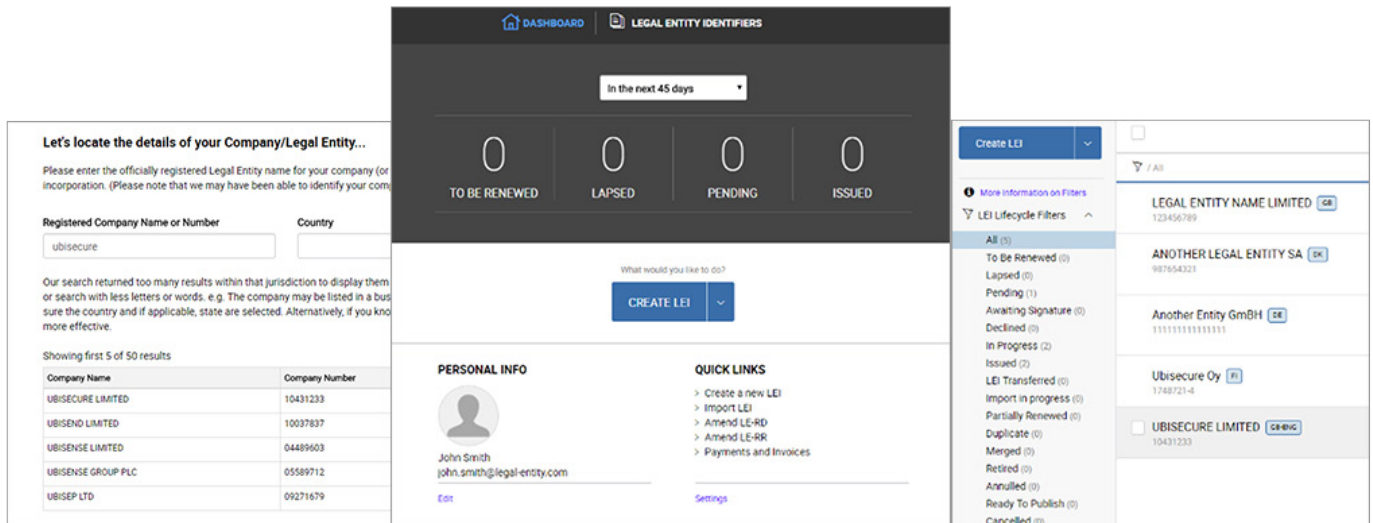

Service delivery

Ubisecure delivers the pilot through its [RapidLEI](#) service. Throughout 2019, RapidLEI has consistently been the fastest-growing LEI Issuer, as well as the most popular service with incoming transfers of existing LEIs. The service has been designed from the ground up to be fully automated for enterprises managing LEIs at scale. The RapidLEI service offers banks:

- **Automated LEI issuance process** – no administrative burden as platform automates or minimises requests for validation data, e-signing, and payment processing.
- **API** – industry's only same-session LEI registration and issuance, reporting, and lifecycle management.
- **Bulk registration** – register LEIs for clients in bulk.
- **Discovery** – service will identify issued, lapsed, missing LEIs.
- **Automated renewal** – avoids lapse risk.
- **Full LEI support** – issue LEIs to organisations, trusts, and funds.
- **Customisable expiry** – assistance with customising/aligning the expiration date.
- **24/7 customer support.**
- **Reduced LEI costs.**
